Art Unit: 3727

3. Claims 1, 2, 4, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by either Burgess (3744699) or Dorofachuk (3572575). Burgess teaches a box having a base and an enclosing wall set. The base having a groove (between portions 50A and 50B) and a plurality of insertion portions (between 32B and 30A) and a buckling protrusion 32B.

Regarding claim 2, note the thickness formed between the groove and the edge of the base is substantially equal to a width between the buckling protrusion and the edge of the enclosing wall set as shown in the erected container.

Regarding claim 5, the tubular portion when portion 12 attached to portion 20 can be folded flat as claimed.

Dorofachuk teaches a box having a base and an enclosing wall set. The base having a groove (between portions 58 and 60) and a plurality of insertion portions (between 26 and the side walls) and a buckling protrusions 26, 28.

Regarding claim 5, the tubular portion in Fig. 2 of can be folded flat as claimed.

4. Claims 1, 2, 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Beaman (2214220). Beaman teaches a box having a base and an enclosing wall set. The base having a groove (between portions 8 and 8a) and a plurality of insertion portions (2 and 5a) and a buckling protrusion 5.

Regarding claim 5, the tubular portion in Fig. 5 can be folded flat as claimed.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Burgess in view of Kaufmann (3967773). It would have been obvious to one of ordinary skill in the art to make the container from plastic as taught by Kaufmann, col. 5, ln. 9, to provide the desired material for the container.

Art Unit: 3727

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the square shaped body in claim 4, the wall being folded flat in claim 5 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear how the enclosing wall can be made in the form of a square body at all. The base is rectangular would assume that the body shape would be rectangular also.

Art Unit: 3727

6. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Burgess or Dorofachuk. To the degree it is argued that either Burgess or Dorofachuk does not teach a square body, ⁱit would have been obvious to one of ordinary skill in the art to provide a square body in either Burgess or Dorofachuk to provide the desired size/shape for the container. A change in size/proportion is generally recognized as being within the level of ordinary skill in the art. (see In re Rose, 105 USPQ 237 (CCPA 1955), and In re Tanczyn, 44 CCPA 704, 766, 241)
